Web Programming

26/05/2009 01:40 by zcomplete

Web programming is a specific job which takes times to discuss and work on. Anything that has to exchange data is required programming eg. questionnaire, web forum, form mail. We have strong experiences with PHP programming which can do almost everything you can imagine to run on your website.

Most of the time, people need to store data somewhere and use it later. We use MySQL as primary database system. Please request if you need it in other platform such as Microsoft SQL, Ms Access, Oracle, etc.

Type of web programming

Stand Alone Module eg. poll, gallery display, visitor counter

System eg. member system, content management system, web blog, online game

Open Source Recommended list

Wordpress

Drupal

Joomla

Blogger

phpBB

OS Commerce

Zen Cart

siteX

MODx

PhpNuke

Integrated System *example* add Wordpress blog into Zen Cart
