Search Engine Optimization

26/05/2009 01:43 by zcomplete

Search engine optimization (SEO) is the way to make your website show in high rank when customers use search engine. Higher rank mean higher chance you will get new customers. This is absolutely interesting for whatever product or service you have.

Our Steps

1. Analyze your website
2. Choose the proper keyword
3. Improve contents in your website to be matched with search engine algorithm
4. Revise the website structure, make efficient site map
5. Register website to search engine directory
6. Add internal and external links
7. Track the website ranking on those search engine

All steps are required specific knowledge and experiences. The process usually takes up to 3 months depends on how popular of your selected keyword. After your website is already on high rank as we guarantee, we will keep tracking and make your website stay on as long as we contracted.

Advantage of SEO

1. Increase visitors to your website. Good news is these visitors are actually your target because they searched for things they want and come to your website by themselves.
2. Increase opportunity to extend sales and market share
3. Increase company reliability
4. Less budget when compare to other advertising type such as magazine, television
